

SIRIO Luce
Italian Style

INTRODUCTION

SIRIO Luce is taking the mission to catch the star light and to shift it into our night times.

Any lighting system has a task overall relevant, to reproduce as much as possible natural effects, to generate an environment supporting our well being.

The human as central point of the system, the natural appearance of his surrounding as target.

SIRIO Luce is taking into proper attention energetic aspects as well as biological compatibility to light in term of glare control, colour rendering, right balance of shades and bright area.

A mission which is based on an accurate selection of products offered in a wide range, extended from indoor to outdoor areas and all of them, equipped with best light sources and controlled by high quality electrical components. In a very busy market, a real star: SIRIO Luce.

SIRIO Luce implementa la missione di catturare la luce delle stelle e riprodurla nelle ore notturne.

Ogni sistema di illuminazione ha un compito rilevante, riprodurre il più possibile gli effetti naturali per generare un ambiente, che corrobora il nostro benessere.

L'uomo come punto centrale del sistema, l'aspetto più naturale possibile del suo ambiente, l'obiettivo.

SIRIO Luce prende in esame gli aspetti energetici e la compatibilità biologica con la luce, valuta attentamente gli indici di abbagliamento, seleziona le rese cromatiche e bilancia i contrasti tra luce ed ombre.

Una missione che si basa su un'accurata selezione dei prodotti, offerti in un'ampia gamma da interni ed esterni, equipaggiati dalle migliori sorgenti luminose e controllati da componenti elettrici di alta qualità.

In un mercato molto saturo, una vera stella: SIRIO Luce.

DESIGN

Designing a complete and suitable luminous environment is more complicated than simply selecting lighting fixtures.

With the help of experience and expertise Sirio is committed to developed spatial patterns of light, shade, and color that requires thinking about light in three dimensions.

Such recognition implies understanding and sensitivity to techniques that create an environment where observers react with feelings of pleasantness and well-being through the use of silhouette, color tone, and other patterns of spatial light.

Progettare un ambiente, rendendolo confortevole e suggestivo, è un compito molto più qualificato che la semplice selezione di prodotti di illuminazione.

Sirio Luce, con l'esperienza dei suoi progettisti, realizza ambienti con il giusto equilibrio di luci ed ombre, determinando una corretta definizione degli spazi.

Tale capacità si basa su una corretta interpretazione emozionale e tecnica, valutando, con specifica sensibilità, la necessità di realizzare ambienti confortevoli e funzionali, nei quali il benessere visivo trova una necessaria rilevanza

The background of the page is a dark gray color, overlaid with a complex, white line-art pattern. This pattern consists of numerous interconnected lines that form a series of overlapping, irregular polygons and triangles, creating a sense of depth and geometric complexity. The lines vary in length and orientation, some forming sharp points while others create broader, more stable shapes. The overall effect is that of a modern, architectural or crystalline structure.
